

The **Mission** of our P.A.R.T.N.E.R Initiative is to reduce the number of overdoses related to the misuse of substances in our community.

We combine clinical and Public Safety personnel to address this misuse and assist those who may be seeking help for themselves or a loved one.

We Provide

- **Resources** and options for treatment or management of substance misuse
- **Education** for families and individuals on the signs, symptoms and risks of substance use disorders
- **Hope** for individuals struggling with substance use disorders
- **Outreach** to locations where overdoses occur in the city at a higher rate
- **Home Visits**
- **Recovery Coaching**

Providing Access to Resources,
Treatment Needs, and Education for
Recovery

Cambridge Police Department

Addiction/Substance Use Disorder is a chronic, relapsing brain disease. It causes a person to compulsively seek and use drugs, despite consequences for themselves and loved ones.

Addiction changes the brain chemistry—both its structure and how it works. It does not discriminate against class, race, ethnicity, or gender, and does not imply an individual is morally bad or has failed. Addiction is a treatable disease that can be managed successfully.

Recovery is Possible.

Overdose Signs & Symptoms

If you witness someone experiencing any of these symptoms, please call 911 immediately.

- Unconscious
- Unresponsive
- Severe difficulty breathing, shallow breaths or complete absence of breathing
- Gurgling sounds (snoring) that indicate a person's airway may be blocked
- Blue Lips or Fingers
- Vomiting
- Seizure/Convulsions
