

Broad Discovery Series x BroadIgnite: An evening of inspired science

with Sumaiya Iqbal, Kiran Garimella,
Jacob Lemieux, Juli Fried, and Raj Gupta

BROAD DISCOVERY SERIES

Early-career scientists often have the most game-changing ideas. Join five emerging scientific visionaries as they talk about their efforts to move the needle on neurodegenerative and metabolic diseases, sudden cardiac death, infectious disease diagnosis and surveillance, and rare genetic disorders.

This Broad Discovery Series event is being held in collaboration with BroadIgnite, an institute program that partners rising philanthropists with early-career researchers involved in high-risk, potentially high-reward projects.

This Broad Discovery Series talk will be held both in person and virtually. Those attending in person are invited to a reception in the Broad Discovery Center following the talk.

Wednesday, May 24 | 5:30 – 6:30 pm
Richard N. Merkin Building Auditorium

Reception to follow
