

Join Mr. Powell and Cambridge-based scientists to explore the science happening around you! Each week a different scientist will run a hands-on activity, presentation, or challenge to explain what they do every day. You'll see real world applications of the scientific method and the engineering design process in action. In addition, you can learn about STEM careers and educational pathways.

# NetPals STEM EXPLORATIONS CLUB

Participating  
companies:

Audible, BioNTech US,  
Broad Institute, GCP  
Applied Technologies,  
Google, MIT, Oracle,  
Novartis
