

Our Curriculum Gives Children the World

Our *World at Their Fingertips*® curriculum prepares children to take on their school-age years and all the exciting steps ahead. Seven curriculum areas — from language and social-emotional learning, to STEM and visual and creative arts — engage children through their own interests. In the classroom, our *Bright Horizons Discovery Driven Learning*™ approach inspires children not just to learn, but to think, act, tinker, create, be bold, experiment, design, and explore.

Health and Wellness

Fosters positive attitudes towards healthy living, physical activity, and nutrition by incorporating healthful habits into daily routines.

Language and Literacy

Cultivates a lifelong love of language, books, and reading through activities for listening, speaking, reading, and writing — all integrated into a language-rich environment.

Social-Emotional Learning

Nurtures children's growing awareness of self and others, which includes gaining self-esteem and a sense of identity, learning to express and manage emotions, and creating strong connections and positive interactions with others.

STEM

Encourages children to explore science, technology, engineering, and math through observation, experimentation, problem solving, and discovery.

Thinking and Learning

Supports children's foundational learning skills such as self-regulation, executive function, and creativity.

Toward a Better World: Community, Character, & Inclusion

Helps children learn respect for our world, its diverse people, and the environment through a wide range of experiences while acknowledging and valuing the rich cultural heritage of families.

Visual and Creative Arts

Encourages children to express themselves artistically and develop an appreciation for art through a variety of experiences — fine art, music, theater, dramatic play, and dance.
